

THE DEKALB® ADVANTAGE

DEKALB® CORN SEED TREATMENT OPTIONS FOR 2017

Growing Confidence

GET MORE OUT OF YOUR CORN. GET MORE SEED TREATMENT OPTIONS ON MORE HYBRIDS WITH THE DEKALB® BRAND

THE DEKALB® ADVANTAGE

The DEKALB brand provides you with more seed treatments options for your corn and soybeans. **New for this year, DEKALB offers almost every corn hybrid with three Acceleron® Seed Applied Solutions; fungicide and insecticide*, fungicide plus Dupont™ Lumivia™ insecticide, and fungicide only.** Having more seed treatment options on more hybrids means you can focus on choosing the right hybrid for your farm. For a complete list of corn and soybean hybrids and the available seed treatments, please check out DEKALB.ca.

NEW FOR 2017

DuPont™ Lumivia™ insecticide seed treatment

Lumivia™ is a premium insecticide seed treatment with a new mode of action, setting new standards for corn growers by helping protect their crop early, achieve a uniform and healthy stand, and improve yield potential.

Lumivia™ provides a novel mode of action for corn

- Lumivia™ is the first insecticide seed treatment using Chlorantraniliprole, the active ingredient belonging to a new class of chemistry called anthranilic diamides.
- As a seed treatment, Lumivia™ is fast acting; within minutes of ingestion, chlorantraniliprole causes paralysis of target pests, preventing feeding, and eventually causing death.

Lumivia™ offers fast-acting protection up to the 4-5 leaf stage against early-season insect pests such as wireworms, cutworms, seed corn maggots, and army worms

- Lumivia™ quickly moves systemically upward throughout the plant from seed germination to V5 seedling stage, delivering protection to new growth.

Lumivia™ provides uniform, healthy stands for maximum yield potential

Lumivia™ has an excellent environmental profile and seed safety

- When used according to label directions, Lumivia™ has minimal impact on beneficial insects and pollinators, as well as other non-target organisms.
- This selectivity, combined with robust pest control makes Lumivia™ a strong tool for Integrated Pest Management (IPM) programs.

Information on DuPont™ Lumivia™ insecticide seed treatment provided by E.I. du Pont de Nemours and Company.

Visit DEKALB.ca for a complete list of available seed treatments for DEKALB® corn hybrids

* DEKALB corn hybrids with this seed treatment are Class 12 Pesticides containing clothianidin.

Monsanto Company is a member of Excellence Through Stewardship® (ETS). Monsanto products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Monsanto's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. These products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from these products can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for these products. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship. ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready® technology contains genes that confer tolerance to glyphosate, an active ingredient in Roundup® brand agricultural herbicides. Agricultural herbicides containing glyphosate will kill crops that are not tolerant to glyphosate. Acceleron® seed applied solutions for corn (fungicides and insecticide) is a combination of four separate individually-registered products, which together contain the active ingredients metalaxyl, prothioconazole, fluoxystrobin, and clothianidin. Acceleron® seed applied solutions for corn (fungicides only) is a combination of three separate individually-registered products, which together contain the active ingredients metalaxyl, prothioconazole and fluoxystrobin. Acceleron® seed applied solutions for corn plus Poncho®/VOTIVO™ (fungicides, insecticide and nematocide) is a combination of five separate individually-registered products, which together contain the active ingredients metalaxyl, prothioconazole, fluoxystrobin, clothianidin and Bacillus firmus strain I-1582. Acceleron® seed applied solutions for corn (fungicides only) plus DuPont™ Lumivia™ insecticide is a combination of four separate individually-registered products, which together contain the active ingredients metalaxyl, prothioconazole, fluoxystrobin and chlorantraniliprole.
