

DKTF 92 SC

PERFORMANCE STORY

Our teams across canola product management, breeding, testing, and agronomy have been evaluating the agronomic performance and attributes of DKTF 92 SC this season. This is what they observed:

BUILT TO STRAIGHT CUT

With DKTF 92 SC, you can straight cut or take advantage of the opportunity to delay swathing. With the "harvest from hell" that we all experienced this year, this product stood strong in wind, rain, and snow.

Pod Integrity

Internal large plot trials across Western Canada in 8 locations in 2018. Data received up to Oct. 16, 2018.

TRUFLEX™ CANOLA WITH ROUNDUP READY® TECHNOLOGY

- Flexibility in spray rates and timing*
- Improved control of tough weeds*
- Higher yield potential through genetics and crop safety*

*Compared to Genuity® Roundup Ready® canola

	DANDELION	FOXTAIL BARLEY	WILD BUCKWHEAT
Genuity® Roundup Ready® Canola	Suppression only	Season-long control	1-3 leaf stage
TruFlex™ CANOLA with Roundup Ready® Technology	Season-long control	Exceptional control	Past 6-leaf stage

*When herbicide is applied at full labeled rates. †99% control of foxtail barley. Source: Monsanto Technology Development. Trials 2009-2010 n=8

MULTI-GENIC BLACKLEG RESISTANCE

DKTF 92 SC has the same best-in-class multi-genic blackleg package as DEKALB 74-44 BL. Its robust disease package contributes to its impressive overall plant health observed throughout the season.

DKTF 92 SC is equipped with **3** major blackleg resistance genes:

Rlm3 (C)
LepR3 (A)
Rlms (G)

STRONG YIELD POTENTIAL

DKTF 92 SC is equipped with a winning combination of strong disease resistance; excellent pod integrity, standability, and harvestability; and competitive yield. When positioned on the most productive land these agronomic attributes have contributed to an even greater yield potential.

Yield Comparison (% of DKTF 92 SC)

Internal large plot trials across Western Canada in 12 locations in 2018. Data received up to Oct. 16, 2018.

There's a fit for this product on your farm. Talk to your DEKALB® brand agronomist or sales rep for their recommendations. We are currently taking pre-orders, so see your retail soon, as supply is limited! Pre-orders will be fulfilled after TruFlex™ canola becomes available for commercial sale or seeding. Current plans are to launch in time for the 2019 growing season.

TruFlex™ canola with Roundup Ready® Technology is not yet available for commercial sale or commercial planting, but current plans are to commercialize for the 2019 growing season. If TruFlex™ canola is not commercialized in the 2019 growing season, then for any pre-orders placed for those products, Monsanto may offer substitute Genuity® Roundup Ready® canola products.

Performance may vary from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields. Monsanto Company is a member of Excellence Through Stewardship® (ETS). Monsanto products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Monsanto's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. These products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from these products can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for these products. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship. ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready® technology contains genes that confer tolerance to glyphosate, an active ingredient in Roundup® brand agricultural herbicides. Agricultural herbicides containing glyphosate will kill crops that are not tolerant to glyphosate. DEKALB® CANOLA

#FINISHINGSTRONG

TruFlex™
CANOLA with Roundup Ready®
Technology

STRAIGHT CUT DEKALB® TRUFLEX™ CANOLA HYBRID DKTF 92 SC.

The newest product of our focused DEKALB Breeding effort on shatter resistance, DKTF 92 SC was bred for straight cutting and tested under local conditions across Western Canada for farmers like you.

NOTE: TruFlex™ canola with Roundup Ready® Technology is not yet available for commercial sale or commercial planting, but current plans are to commercialize for the 2019 growing season.

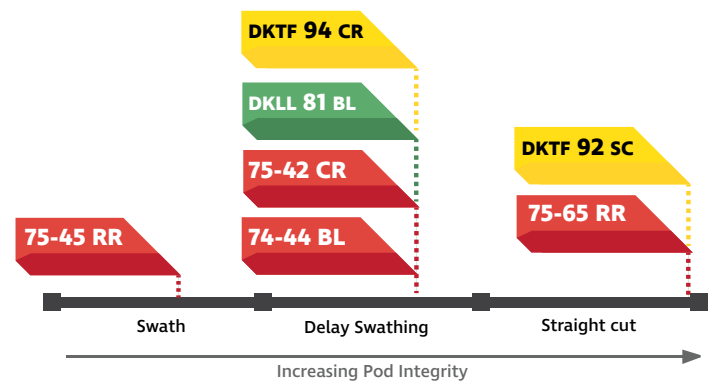

Hybrid characteristics:

- Excellent pod integrity
- Excellent yield potential
- Very good harvest ease
- Best in class multi-genic, R-rated blackleg resistance
- Will enable improved weed control, with flexible application rates and a wider window of application up to first flower, compared to our current technology
- Will be treated with JumpStart® XL Liquid Inoculant
- Additional seed treatments that will be available: Helix® Vibrance®, Helix® Vibrance® & Fortenza®, Visivio™, and Visivio™ & Fortenza®

Visivio™ contains the active ingredients difenoconazole, metalaxyl (M and S isomers), fludioxonil, thiamethoxam, sedaxane and sulfoxaflor. Fortenza® contains the active ingredient cyantraniliprole.

STRONG FOR STRAIGHT CUT.

HARVEST RECOMMENDATION

TruFlex™ canola with Roundup Ready® Technology is not yet available for commercial sale or commercial planting, but current plans are to commercialize for the 2019 growing season.
