DKLL 81 BL

DKLL 81 BL gives you the option to continue with the genetic potential, and disease management you know and trust from today's leading DEKALB canola hybrids, while offering you the opportunity to only use Liberty® herbicide.

- Best in class multi-genic, R-rated blackleg resistance
- High yield potential
- Excellent harvest ease
- Includes the LibertyLink® trait providing tolerance to the Liberty® herbicide (not glyphosate tolerance)
- Treated with JumpStart® XL Liquid Inoculant
- Additional seed treatments available: Prosper® Evergol®, Helix® Vibrance®, Fortenza® Advanced.

JumpStart XL is shown to promote early vigour, greater stress tolerance, earlier and more even maturity and higher yield potential by increasing the availability of phosphate to the plant. In 75 independent large-plot research trials, crops treated with JumpStart averaged 7% higher yields than untreated.*

*Results from Western Canada from 1995-2017. Performance may vary from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.
